Lahti, Finland on 22.-23.11.2006

Speed-up Innovations - Forest-Based Sector Technology Platform in Action

Innovation and renewability are key drivers for future competitiveness and economic growth in Europe. Using renewable natural resources supports Europe's sustainable growth and consumption. Wood raw material is used to make durable, safe and healthy products - even more so in the future.

The Forest-Based Sector Technology Platform invites you to Lahti, Finland to turn the Strategic Research Agenda to research cooperation and action. It is time to get hands on the work, and create real workable projects.

Venue:

The Sibelius Hall, Lahti, Finland. The Sibelius Hall is a model example of new and modern wood construction technology. It is about 50 min. drive from the Helsinki-Vantaa Airport.

Aim of the conference:

- Promote the implementation of the Strategic Research Agenda
- Prepare industry and research community for the 7. Framework Programme on Research
- Inform on other funding tools
- Build consortia and prepare project proposals

Programme:

Wednesday 22.11.2006	Opening Session (afternoon) Renewable Dinner
Thursday 23.11.2006	Parallel Sessions on Value Chains Lahti Symphony Orchestra Concert

More information:
